# PER QUÈ UN DIA MUNDIAL DEL DONANT DE MEDULLA ÒSSIA?

Serving blood stem cell organisations worldwide

Dear WMDA member,

Working with cord blood and blood stem cell donor registries around the world, and after the initial organisation of a Donor Day by Italy, France, Belgium and Spain the WMDA has initiated a new movement to raise awareness about blood stem cell donation among the general public. For the first time 'World Marrow Donor Day (WMDD)' will be celebrated on the third Saturday of September. This year it will be celebrated on September 19th and we hope it will be the first celebration of many more to come. Because the number of donors registered in BMDW recently surpassed 25 million, the theme of the celebration this year will be '25 million donors'. We will be celebrating this milestone, thanking all those that have registered, thanking donors for donating and saving lives, and celebrating the international exchange and cooperation between organisations worldwide.

As a part of this event, we want to emphasize that although 25 million donors sounds like a huge number and a big accomplishment, many more donors are still needed. We want to send out a positive signal to the currently registered donors, showing the world how important one single person can be for someone else at the other side of the world, and simultaneously encourage more people to join a registry.

We are aware there are several other similar celebrations that you participate in within your country. However, the WMDD is unlike any other. It celebrates the volunteer donor and it recognizes the importance of the international exchange of activity that is the hallmark of our combined efforts. We ask you and your employees to celebrate this unique day with us by participating in the worldwide celebration of 25 million individuals who have already joined a registry and extending an invitation to others because the need is still there. The celebration will start in New Zealand and ends in Hawaii on September 19th.

We encourage any form of participation. It doesn't have to be a big or expensive event; small gestures of thanks are just as valuable. Be creative and let your heart speak. Make thank you pictures with your team or donors and post them on your Facebook page or website, invite your donors and ask them to give a blood sample in order to perform high resolution HLA-typing. Be creative and participate.

We would very much like to hear from you what your ideas are.  
With kind regards and big thank you from our side,

WMDA office and WMDD task force

World Marrow Donor Day

## Bone Marrow Donors Worldwide is celebrating a momentous milestone

**Bone Marrow Donors Worldwide is celebrating a momentous milestone: 25 million people are currently listed as potential marrow donors on worldwide donor registries:** This record number of registry members gives greater hope to blood cancer patients, caregivers and healthcare professionals around the world

### Welcome to Bone Marrow Donors Worldwide

Bone Marrow Donors Worldwide (BMDW) is the continuing effort to collect the HLA phenotypes and other relevant data of volunteer stem cell donors and cord blood units, and is responsible for the co-ordination of their worldwide distribution. Participants are 75 stem cell donor registries from 53 countries, and 53 cord blood registries from 36 countries.

The current number of donors and cord blood units in the BMDW database is:

**26,741,410** (26,056,502 donors and 684,908 CBU's)

## Per què...

---

Cada any, a l'Estat espanyol, unes 5.000 persones són diagnosticades de leucèmia aguda, 7.000 de limfoma i 4.500 d'altres hemopaties malignes.

## Per què...

---

Només 1 de cada 4 malats té un donant familiar compatible...

Malgrat hi ha més de 25 milions de donants inscrits als Registres Internacionals...

... Encara hi ha un 20% dels nostres pacients que no troben un donant compatible

**Per què...**

---

Quants més donants tinguem registrats...

... Més probabilitat d'èxit tindran els nostres pacients.

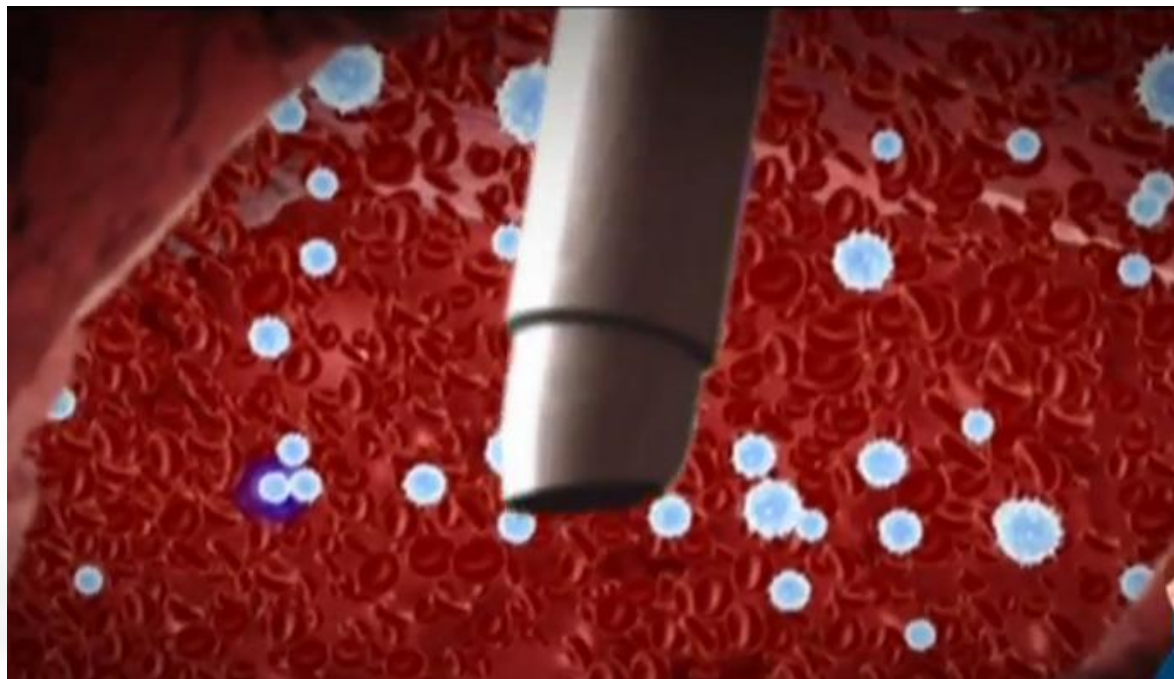

## Què hem de fer des de les institucions...

---

- Promocionar la donació.....
    - Generant informació
    - Organitzant actes i divulgant experiències i testimonis
    - Creant una cultura favorable a la donació a l'entorn dels serveis sanitaris
    - ....
- ... Per incrementar la sensibilització de la societat cap a la donació en general, i en concret sobre la donació de medul·la òssia
