

Aim

To promote economic activity in the current digital environment, establishing the principles, approaches and tools that Catalan public administrations will apply to facilitate a more agile and efficient relationship with business actors

Reduce
red tape for companies and professionals and simplify the framework for public intervention

Implement
proactive digital services based on management and analysis of the data provided by companies and professionals

New model for business-administration relations based on:

- (a) Mutual trust
- (b) Digital relationship by default
- (c) One-time only provision of data
- (d) Elimination of unnecessary red tape
- (e) Standardisation of procedures
- (f) Speedy handling of administrative processes
- (g) Transparency with respect to user data

New features
