Our challenge is to further **reduce greenhouse gas emissions** and **curb** rising temperatures

Commitments

We have produced a document proposing a series of general and sector-specific commitments that socio-economic and professional organisations, public administrations and other actors are invited to adopt

- ✓ **Sign up** to Catalonia's goal of becoming carbon neutral by 2050
- ✓ **Gain a deeper understanding** of the climate impact of their activity
- ✓ **Disseminate** and promote the climate commitment within their organisation
- ✓ **Drive forward** the energy transition in their activity
- ✓ **Reduce** the climate impact of the mobility they generate
- ✓ **Progressively adopt** the principles of the circular economy

Commitments for 11 sectors

Local administration / Socio-economic organisation / Urban planning, architecture and construction / Environment and energy / Finance / Mobility, public transport and logistics / Trade, tourism and services / Industrial and digital sector / Primary sector / Higher education and research / Health institutions
